Bravura Safe

Enterprise Password Management

Studies have shown that each person has to remember an average of 70 to 100 passwords for external services and internal resources, including sensitive spreadsheets, websites, knowledge bases, productivity apps, and systems. They also have a range of digital records or secrets to safeguard, like corporate credit cards, SSH keys, certificates, and more.

While many organizations have implemented strong internal password management solutions and combined them with easy-to-use Single Sign-On (SSO) features, IT teams now have another cybersecurity risk: an explosion of unmanaged passwords and secrets outside of the IT enterprise, which provides access to critical systems, cloud services, business applications, and other resources.. How are your users managing their passwords and secrets?

Best case, this gap has forced user populations to use unmanaged third-party solutions to store and manage their passwords and secrets, or worse, stash them in chat messages, on spreadsheets, or re-use primary organization passwords to make them easier to remember. Weak and insecure passwords are an easy target and are often a hacker's first entry point into your organization. How safe are your organization's decentralized passwords?

Ensure Decentralized Passwords Are Not A Loose Thread

Bravura Safe is an enterprise password safe with a robust central security manager that complements core password management solutions that the organization already uses. It leverages two decades of enterprise cybersecurity solutions to provide password storage that centrally controls, manages, and protects decentralized passwords, secrets, and files, users can securely send time-bound passwords for new accounts, encryption keys for files, or entire files without them being leaked or intercepted, which can be secured with biometric authentication.

ONE PLATFORM. TOTAL PROTECTION.

We safeguard what matters most – your business, your people and your data – by delivering intelligent identity security solutions that adapt to the ever-changing cybersecurity landscape. With the Bravura Security Fabric you stay ahead of evolving risks with seamless, unified protection.

Bravura Pass

Bravura Pass is a self-service password reset and enterprise password management solution that empowers users while giving IT and Security full control.

The Next Gen edition automates enterprisewide Mass Password Reset through Bravura Safe, includes real-time strength feedback, API-level reporting, and a modern, accessible UI. It reduces help desk costs, containing breaches faster, and proving compliance at scale.

Bravura Privilege

Frictionless, time-limited privileged access to reduce IT security risk and enhance accountability. Facilitate password randomizations and authorize access with a highly available, geo-redundant solution.

Bravura Identity

Identity administration and access governance with full process automation, on-premises and in the cloud.

Central Password Management

A centralized management console for the password repository provides IT security with full visibility (without values of passwords) and all capabilities that enterprise security professionals are familiar with to manage these decentralized passwords.

Auto-Generate Strong Passwords

Auto-generated passwords are strong and unique, ensuring they are without semblance. All decentralized passwords that leave the IT security boundary are strong and without semblance to any password used within the organization.

Simplify Password Storage

Save all passwords in one safe place secured with a master password or biometrics and access them across all trusted devices.

Encrypted Repository

Centrally store and encrypt all decentralized passwords, secrets, and files in a high-security database for easier management and better visibility.

Safely Send Sensitive Content:

Safely send sensitive text or files to other users or individuals outside the organization, sharing only an encrypted URL to access and download.

Consumer-Grade User Interface:

Create and manage passwords using an easy-to-use consumer-grade interface so that users can easily create and manage these passwords without heavy IT support.

Improve Security Hygiene:

Help users make better decisions by alerting them to the risks and informing them when they are using weak, compromised, or synchronized passwords to improve password hygiene.

Flexible Deployment Options:

Bravura Safe can be implemented in a SaaS public cloud.

Fast Deployment:

Bravura Safe can be implemented in minutes with a fast, IT-friendly "load and go" architecture, with users easily onboarded in a self-service process.

Compatible with the Bravura Security Fabric:

Bravura Safe operates as a standalone solution and can be used with the Bravura Pass.

We Are Bravura Security —

As a recognized market leader, we deliver access governance and identity administration solutions to organizations globally, including many Fortune 500 companies. By leveraging decades of experience, we provide the industry's only single platform identity and privileged access solution to simplify implementation as your IAM and PAM roadmaps evolve.
