

We protect what matters most: your people and your data. As a leader in identity security, our unified, modular platform closes critical security gaps. For over 30 years, we've safeguarded Fortune 500 companies with best-in-class identity, access, and password solutions serving over 14 million users worldwide.

DATA SHEET

Bravura Security Fabric

Identity Security Fabric

Recognizing the critical importance of safeguarding organizational data and the complexities of managing user access, our Identity and Access Management (IAM) solutions and credential management systems are embedded with automation to offer a unified approach to security and efficiency. These solutions seamlessly integrate access governance, such as access certifications, reviews, and role management, into a cohesive framework that enhances security through rigorous password governance and Privileged Access Management (PAM). Our solutions thoughtfully demonstrate an understanding of compliance needs, facilitating adherence to standards like GDPR and HIPAA with automated precision. Centralized control over user permissions, including those for privileged accounts, is managed with insight, ensuring robust policy enforcement and clear auditability. This ensures you can confidently manage access across diverse systems, balancing stringent security with a delightful user experience.

With its versatile patterns for various industries, the Bravura Security Fabric protects identities independent of location. Our platform combines best-in-class products to create a secure digital environment:

Bravura Identity:

Identity lifecycle automation, governance & policy enforcement

Bravura Privilege:

Frictionless, time-limited, elevated access

Next Generation Bravura Pass:

Free users and empower IT to regain control at scale.

Bravura Safe:

Zero-knowledge encryption, enterprise password vault for end-users

Streamline Operations with Identity Lifecycle Management

Our Identity Lifecycle Management seamlessly manages user identities. The Bravura Security Fabric unlocks streamlined onboarding, role and affiliation management, and secure access revocation, catering to employees, contractors, and partners. Its scalable design adapts to changing staffing needs.

Secure and Comprehensive Integration

As part of the Bravura Security Fabric, Bravura Privilege includes a rich library of native and universal connectors. Organizations can use this library to secure modern and legacy systems such as mainframe, AS/400, SAP, and more. Additionally, our REST API features fine-grained endpoint policies that ensure third-party integrations are tightly controlled.

ONE PLATFORM. TOTAL PROTECTION.

Bravura Identity

Identity administration and access governance with full process automation, on-premises and in the cloud.

Bravura Privilege

Frictionless, time-limited privileged access to reduce IT security risk and enhance accountability. Facilitate password randomizations and authorize access with a highly available, geo-redundant solution.

Bravura Pass

Bravura Pass is a self-service password reset and enterprise password management solution that empowers users while giving IT and Security full control.

The Next Gen edition automates enterprise-wide Mass Password Reset through Bravura Safe, includes real-time strength feedback, API-level reporting, and a modern, accessible UI. It reduces help desk costs, containing breaches faster, and proving compliance at scale.

Bravura Safe

Beyond SSO and privilege, manage and vault decentralized secrets and passwords. Auto-generated credentials are safely under lock and key for seamless user access.

Reduce Total Cost of Ownership

The Bravura Security Fabric automates processes, reduces complexity, and shortens on-premise, cloud, and SaaS deployments to lower total cost of ownership. Our Solution Delivery services further reduce costs by streamlining implementation, integration, and deployment processes.

Scalable Security: Unified IAM, PAM, and Automated Password Governance

The power of a unified security fabric, integrating IAM, PAM, and password governance, offers organizations a resilient foundation that meets their current security needs and scales seamlessly with their evolution. This modular approach allows for the organic growth of security measures, ensuring that as an organization expands, its security capabilities can mature in tandem. The interplay between IAM and PAM strengthens an enterprise's defense against internal and external threats, providing a comprehensive oversight of user activity and privileged account management. Password governance policies are consistently enforced, reducing the risk of breaches and reinforcing a culture of cybersecurity awareness. The addition of automation into this fabric magnifies its benefits, streamlining security protocols, minimizing human error, and freeing up valuable IT resources. Automated processes accelerate user provisioning and deprovisioning, ensure timely compliance updates, and delivers swift responses to emerging threats, all of which enhance operational efficiency and maintain a robust and adaptable security posture.

Strengthening Your Defenses with IAM and PAM Synergy

Harmonizing IAM with PAM enhances your defense against both internal and external threats. This strategic combination provides comprehensive oversight of your user activities and privileged account management—a cornerstone of your security strategy. It guarantees the consistent enforcement of password governance policies, reducing your risk of breaches.

Automating for Streamlined Security

Incorporating automation into your security fabric boosts its effectiveness, streamlining your security protocols and cutting down on human error. Automation handles routine tasks like user provisioning and deprovisioning, keeps your compliance up-to-date, and responds swiftly to emerging threats. This shift frees up your IT resources for strategic initiatives, enhancing your operational workflows and maintaining an adaptive, responsive security posture in the face of a constantly changing digital environment.

Seamlessly Connect Your Infrastructure

Ensure your entire system infrastructure and applications harmoniously integrate with your identity and access management solution. Bravura Security provides an extensive network of over 100 connectors, ensuring compatibility with a wide array of systems, including:

- Universal connectors/integrations tailored to your unique legacy or proprietary systems.
- Human Resources Management Systems (HRMS) to streamline HR operations such as hiring, payroll, and employee benefits administration.
- Enterprise Resource Planning (ERP) systems manage and integrate important parts of your organization, including procurement, project management, operations, and sales.
- Customer Relationship Management (CRM) systems manage interactions with current and potential customers, helping improve relationships.
- Financial Management Systems will oversee your organization's financial activities, including budgeting, accounting, and financial reporting.
- Plus many more. REST and SOAP APIs are also available.

Ready to Take Your Strategy Forward?

Engage with our team to explore how your enterprise can achieve immediate visibility into your environment with minimal investment of effort, risk, and expenditure, all while ensuring a seamless integration process. We invite you to schedule a complimentary consultation and solution showcase to delve into strategizing your identity security roadmap.
